

Appendix A2: THE TRINITY OF TEN

APPENDIX A2: THE TRINITY OF TEN

The Aradean mythology.

It is said that the Wraiths were Valkyries who, over a number of millenniums, grew closer to their makers than most, and as their connection became stronger their power grew exponentially. The Wraiths have their own personal agendas they attempt to fulfill while also serving their divine masters, and it is often mistakenly believed that the deeds of the Wraiths are in fact physical manifestations of the Immortals themselves. While this is not true, for reasons stated in the Chapter 1: The First Age, the Wraiths are the heralds and intermediates of the Immortals, and as such, inseparable part of the Aradean mythology. In the old songs and tales, the Wraiths often appear simply as named Valkyries, which gives them a highlighted role and helps them to stand out from others. They are the leaders and exemplary individuals among the vast armies always marching across the infinite welkin.

Immortal	Wraiths	Description / Key words
